ABOUT SETH

Seth Gruber has a momentum in his ministry of reaching millennials and Gen Z to have a culture of Life. He has a training platform online for this. He reaches older generations through his education on the truth behind abortion by educating on the participants and the agenda of those who started abortion on demand, how it was funded and their plan to continue abortion (and why). His message is very close to Eric Metaxas in pointing out that the church (in general) is being silent in the issue of sanctity of life and abortion. Seth can be loud and outspoken (energetic), but soooo knowledgeable and passionate about his message. His energy is what is making his ministry the fastest growing pro-life mission right now. Here is an example of a speech.
